Sterling and Wilson Engineering Proprietary Limited

(Registration number 2013/189325/07)

Annual Financial Statements for the year ended 31 March 2022

Directors' Responsibilities and Approval

The directors are required in terms of the Companies Act of South Africa to maintain adequate accounting records and are responsible for the content and integrity of the annual financial statements and related financial information included in this report. It is their responsibility to ensure that the annual financial statements fairly present the state of affairs of the company as at the end of the financial year and the results of its operations and cash flows for the period then ended, in conformity with International Financial Reporting Standards. The external auditors are engaged to express an independent opinion on the annual financial statements.

The annual financial statements are prepared in accordance with International Financial Reporting Standards and are based upon appropriate accounting policies consistently applied and supported by reasonable and prudent judgements and estimates.

The directors acknowledge that they are ultimately responsible for the system of internal financial control established by the company and place considerable importance on maintaining a strong control environment. To enable the directors to meet these responsibilities, the directors sets standards for internal control aimed at reducing the risk of error or loss in a cost effective manner. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure an acceptable level of risk. These controls are monitored throughout the company and all employees are required to maintain the highest ethical standards in ensuring the company's business is conducted in a manner that in all reasonable circumstances is above reproach. The focus of risk management in the company is on identifying, assessing, managing and monitoring all known forms of risk across the company. While operating risk cannot be fully eliminated, the company endeavours to minimise it by ensuring that appropriate infrastructure, controls, systems and ethical behaviour are applied and managed within predetermined procedures and constraints.

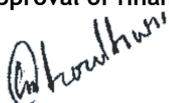

The directors are of the opinion, based on the information and explanations given by management, that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the annual financial statements. However, any system of internal financial control can provide only reasonable, and not absolute, assurance against material misstatement or loss.

The directors have reviewed the company's cash flow forecast for the year from date of approval and, in light of this review and the current financial position, they are satisfied that the company has or had access to adequate resources to continue in operational existence for the foreseeable future.

The external auditors are responsible for independently auditing and reporting on the company's financial statements. The financial statements have been examined by the company's external auditors and their report is presented on pages 4 to 6.

The annual financial statements set out on pages 7 to 39, which have been prepared on the going concern basis, were approved by the directors on 08/06/2022 and were signed on their behalf by:

INDEPENDENT AUDITOR'S REPORT

TO THE SHAREHOLDERS OF STERLING AND WILSON ENGINEERING PROPRIETARY LIMITED

Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of Sterling and Wilson Engineering Proprietary Limited set out on pages 9 to 37, which comprise the statement of financial position as at 31 March 2022, and the statement of profit or loss and other comprehensive income, statement of changes in equity and statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the financial statements present fairly, in all material respects, the financial position of Sterling and Wilson Engineering Proprietary Limited as at 31 March 2022, and its financial performance and cash flows for the year then ended in accordance with International Financial Reporting Standards and the requirements of the Companies Act of South Africa.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the financial statements section of our report. We are independent of the company in accordance with the Independent Regulatory Board for Auditors' Code of Professional Conduct for Registered Auditors (IRBA Code) and other independence requirements applicable to performing audits of financial statements in South Africa. We have fulfilled our other ethical responsibilities in accordance with the IRBA Code and in accordance with other ethical requirements applicable to performing audits in South Africa. The IRBA Code is consistent with the corresponding sections of the International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (including International Independence Standards). We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Each member of the RSM network is an independent accounting and consulting firm which practices in its own right. The RSM network is not itself a separate legal entity in any jurisdiction.

Other information

The directors are responsible for the other information. The other information comprises the directors' responsibilities and approval statement, the directors' report as required by the Companies Act of South Africa and the detailed income statement. Other information does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express an audit opinion or any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed on the information obtained prior to the date of this auditor's report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the directors for the financial statements

The directors are responsible for the preparation and fair presentation of the financial statements in accordance with International Financial Reporting Standards and the requirements of the Companies Act of South Africa, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the company or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with International Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with International Standards on Auditing, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.

- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Date 08/06/2022

Sterling and Wilson Engineering Proprietary Limited

(Registration number 2013/189325/07)

Annual Financial Statements for the year ended 31 March 2022

Directors' Report

The directors have pleasure in submitting their report on the annual financial statements of Sterling and Wilson Engineering Proprietary Limited for the year ended 31 March 2022.

1. Nature of business

Sterling and Wilson Engineering Proprietary Limited was incorporated in South Africa with interests in the solar generation industry. The company operates in South Africa, rest of Africa and Europe.

There have been no material changes to the nature of the company's business from the prior year.

2. Review of financial results and activities

The annual financial statements have been prepared in accordance with International Financial Reporting Standards and the requirements of the Companies Act of South Africa. The accounting policies have been applied consistently compared to the prior year.

Full details of the financial position, results of operations and cash flows of the company are set out in these annual financial statements.

3. Share capital

There have been no changes to the authorised or issued share capital during the year under review.

4. Dividends

No dividends were declared for the year end 31 March 2022 (2021: Nil).

5. Directorate

The directors in office at the date of this report are as follows:

Directors	Nationality
A Choudhuri	Indian
ND Madan	Indian
MP Nyama	South African

6. Property, plant and equipment

There was no change in the nature of the property, plant and equipment of the company or in the policy regarding their use.

7. Events after the reporting period

The COVID-19 pandemic continued into the 2021 with vaccination programs globally underway and a cautiously positive outlook for 2022. The company has not been significantly impacted to date.

The directors are not aware of any material event which occurred after the reporting date and up to the date of this report.

8. Going concern

We draw attention to the fact that at 31 March 2022, the company had accumulated losses of R (30 811 950) and that the company's total liabilities exceed its assets by R (30 811 830).

The annual financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business.

Management strongly believes that the company is a going concern as they are continuing with the 20 years operations and maintenance contract of which 6 years has been completed to date and this contract has a high gross margin. In addition to this, to support the continuance of the Company's operations, the shareholder has confirmed its willingness to continue the operations of the Company and to provide sufficient funds as may be necessary to meet liabilities that cannot be met out of the Company's available resources.

Sterling and Wilson Engineering Proprietary Limited

(Registration number 2013/189325/07)

Annual Financial Statements for the year ended 31 March 2022

Directors' Report

9. Auditors

RSM South Africa Incorporated continued in office in accordance with section 90 of the Companies Act of South Africa.

10. Secretary

The company had no secretary during the year.

11. Liquidity and solvency

The directors have performed the required liquidity and solvency tests required by the Companies Act of South Africa.

Annual Financial Statements for the year ended 31 March 2022

Accounting Policies

1. Significant accounting policies

The principal accounting policies applied in the preparation of these annual financial statements are set out below.

1.1 Basis of preparation

The annual financial statements have been prepared on the going concern basis in accordance with, and in compliance with, International Financial Reporting Standards ("IFRS") and International Financial Reporting Interpretations Committee ("IFRIC") interpretations issued and effective at the time of preparing these annual financial statements and the Companies Act of South Africa of South Africa, as amended.

The annual financial statements have been prepared on the historic cost convention, unless otherwise stated in the accounting policies which follow and incorporate the principal accounting policies set out below. They are presented in Rands, which is the company's functional currency.

These accounting policies are consistent with the previous period.

1.2 Critical accounting estimates, judgements and assumptions

The preparation of annual financial statements in conformity with IFRS requires management, from time to time, to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets, liabilities, income and expenses. These estimates and associated assumptions are based on experience and various other factors that are believed to be reasonable under the circumstances. Actual results may differ from these estimates. The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised and in any future periods affected.

Critical judgements in applying accounting policies

The critical judgements made by management in applying accounting policies, apart from those involving estimations, that have the most significant effect on the amounts recognised in the financial statements, are outlined as follows:

Key sources of estimation uncertainty

Impairment losses on trade receivables

The company reviews its trade receivables to assess impairment at regular intervals. In determining whether impairment losses should be reported in the Statement of Profit and Loss, the company makes judgments as to whether there is any observable data indicating that there is a measurable decrease in the estimated future cash flows. Accordingly, an allowance for expected credit loss is made where there is an identified loss event or condition which, based on previous experience, is evidence of a reduction in the recoverability of the cash flows.

Taxation

Judgement is required in determining the provision for income taxes due to the complexity of legislation. There are many transactions and calculations for which the ultimate tax determination is uncertain during the ordinary course of business. The entity recognises liabilities for anticipated tax issues based on estimates of whether additional taxes will be due. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the income tax and deferred tax provisions in the period in which such determination is made.

The entity recognises the net future tax benefit related to deferred income tax assets to the extent that it is probable that the deductible temporary differences will reverse in the foreseeable future. Assessing the recoverability of deferred income tax assets requires the entity to make significant estimates related to expectations of future taxable income. Estimates of future taxable income are based on forecast cash flows from operations and the application of existing tax laws in each jurisdiction. To the extent that future cash flows and taxable income differ significantly from estimates, the ability of the entity to realise the net deferred tax assets recorded at the reporting date could be impacted.

Sterling and Wilson Engineering Proprietary Limited

(Registration number 2013/189325/07)

Annual Financial Statements for the year ended 31 March 2022

Accounting Policies

1.2 Critical accounting estimates, judgements and assumptions (continued)

Impairment testing

The company reviews and tests the carrying value of assets when events or changes in circumstances suggest that the carrying amount may not be recoverable. When such indicators exist, management determine the recoverable amount by performing value in use and fair value calculations. These calculations require the use of estimates and assumptions. When it is not possible to determine the recoverable amount for an individual asset, management assesses the recoverable amount for the cash generating unit to which the asset belongs.

Residual values and useful lives

The company assesses the appropriateness of the useful lives and residual values of property, plant and equipment at the end of each reporting period. In determining whether there is a change in the useful lives and residual values of the property, plant and equipment of the company, the company makes judgements as to whether there is observable data indicating such changes e.g a change in the manner of use or technological development. Actual results in the future could differ from these estimates which may impact the depreciation change for the year.

Provisions

Provisions are inherently based on assumptions and estimates using the best information available. Additional disclosure of these estimates of provisions are included in note 12.

1.3 Property, plant and equipment

Property, plant and equipment are tangible assets which the company holds for its own use or for rental to others and which are expected to be used for more than one year.

An item of property, plant and equipment is recognised as an asset when it is probable that future economic benefits associated with the item will flow to the company, and the cost of the item can be measured reliably.

Property, plant and equipment is initially measured at cost. Cost includes all of the expenditure which is directly attributable to the acquisition or construction of the asset. The company's borrowing costs are expensed per the policy and there is no hedging.

Property, plant and equipment is subsequently stated at cost less accumulated depreciation and any accumulated impairment losses.

Depreciation of an asset commences when the asset is available for use as intended by management. Depreciation is charged to write off the asset's carrying amount over its estimated useful life to its estimated residual value, using a method that best reflects the pattern in which the asset's economic benefits are consumed by the company. Leased assets are depreciated in a consistent manner over the shorter of their expected useful lives and the lease term. Depreciation is not charged to an asset if its estimated residual value exceeds or is equal to its carrying amount. Depreciation of an asset ceases at the earlier of the date that the asset is classified as held for sale or derecognised.

The useful lives of items of property, plant and equipment have been assessed as follows:

Item	Depreciation method	Average useful life
Computer equipment	Straight line	3 years
Computer software	Straight line	2 years
Motor vehicles	Straight line	5 years
Office equipment	Straight line	5 years
Other fixed assets	Straight line	10 years
Tools & equipment	Straight line	6 years

The residual value, useful life and depreciation method of each asset are reviewed at the end of each reporting year. If the expectations differ from previous estimates, the change is accounted for prospectively as a change in accounting estimate.

Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately.

Sterling and Wilson Engineering Proprietary Limited

(Registration number 2013/189325/07)

Annual Financial Statements for the year ended 31 March 2022

Accounting Policies

1.3 Property, plant and equipment (continued)

The depreciation charge for each year is recognised in profit or loss unless it is included in the carrying amount of another asset.

Impairment tests are performed on property, plant and equipment when there is an indicator that they may be impaired. When the carrying amount of an item of property, plant and equipment is assessed to be higher than the estimated recoverable amount, an impairment loss is recognised immediately in profit or loss to bring the carrying amount in line with the recoverable amount.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected from its continued use or disposal. Any gain or loss arising from the derecognition of an item of property, plant and equipment, determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item, is included in profit or loss when the item is derecognised.

1.4 Financial instruments

Financial instruments held by the company are classified in accordance with the provisions of IFRS 9 Financial Instruments.

Broadly, the classification possibilities, which are adopted by the company, as applicable, are as follows:

Financial assets which are debt instruments:

- Amortised cost.
- Mandatorily at fair value through profit or loss. (This classification automatically applies to all debt instruments which do not qualify as at amortised cost or at fair value through other comprehensive income).

Financial liabilities:

- Amortised cost.

Note 23 Financial instruments and risk management presents the financial instruments held by the company based on their specific classifications.

Trade and other receivables

Classification

Trade and other receivables, excluding, when applicable, VAT and prepayments, are classified as financial assets subsequently measured at amortised cost (note 7).

They have been classified in this manner because their contractual terms give rise, on specified dates to cash flows that are solely payments of principal and interest on the principal outstanding, and the company's business model is to collect the contractual cash flows on trade and other receivables.

Recognition and measurement

Trade and other receivables are recognised when the company becomes a party to the contractual provisions of the receivables. They are measured, at initial recognition, at fair value plus transaction costs, if any.

They are subsequently measured at amortised cost.

The amortised cost is the amount recognised on the receivable initially, minus principal repayments, plus cumulative amortisation (interest) using the effective interest method of any difference between the initial amount and the maturity amount, adjusted for any loss allowance.

Credit risk

Details of credit risk are included in the trade and other receivables note (note 7) and the financial instruments and risk management note (note 23).

Accounting Policies

1.4 Financial instruments (continued)

Investments in debt instruments at fair value through profit or loss

Classification

Certain investments in debt instruments are classified as mandatorily at fair value through profit or loss. These investments do not qualify for classification at amortised cost or at fair value through other comprehensive income because either the contractual terms of these instruments do not give rise, on specified dates to cash flows that are solely payments of principal and interest on the principal outstanding, or the objectives of the company business model are met by selling the instruments rather than holding them to collect the contractual cash flows.

The company has designated certain investments in debt instruments as at fair value through profit or loss. The reason for the designation is to reduce or eliminate an accounting mismatch which would occur if the instruments were not classified as such.

Recognition and measurement

Investments in debt instruments at fair value through profit or loss are recognised when the company becomes a party to the contractual provisions of the instrument. The investments are measured, at initial recognition and subsequently, at fair value. Transaction costs are recognised in profit or loss.

Fair value gains or losses are included in other operating gains (losses).

Interest received on debt instruments at fair value through profit or loss are included in investment income (note 17).

Loans from group companies

Classification

Loans from group companies are classified as financial liabilities subsequently measured at amortised cost.

Recognition and measurement

Loans from group companies are recognised when the company becomes a party to the contractual provisions of the loan. The loans are measured, at initial recognition, at fair value plus transaction costs, if any.

They are subsequently measured at amortised cost using the effective interest method.

The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial liability, or (where appropriate) a shorter period, to the amortised cost of a financial liability.

Interest expense, calculated on the effective interest method, is included in profit or loss in finance costs (note 18).

Borrowings expose the company to liquidity risk and interest rate risk. Refer to note 23 for details of risk exposure and management thereof.

Sterling and Wilson Engineering Proprietary Limited

(Registration number 2013/189325/07)

Annual Financial Statements for the year ended 31 March 2022

Accounting Policies

1.4 Financial instruments (continued)

Trade and other payables

Classification

Trade and other payables (note 10), excluding VAT and amounts received in advance, are classified as financial liabilities subsequently measured at amortised cost.

Recognition and measurement

They are recognised when the company becomes a party to the contractual provisions, and are measured, at initial recognition, at fair value plus transaction costs, if any.

They are subsequently measured at amortised cost using the effective interest method.

The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial liability, or (where appropriate) a shorter period, to the amortised cost of a financial liability.

If trade and other payables contain a significant financing component, and the effective interest method results in the recognition of interest expense, then it is included in profit or loss in finance costs (note 18).

Trade and other payables expose the company to liquidity risk and possibly to interest rate risk. Refer to note 23 for details of risk exposure and management thereof.

Cash and cash equivalents

Cash and cash equivalents comprise cash balances and other short-term financial assets readily realisable in cash. Cash and cash equivalents are stated at carrying amount which is deemed to be fair value.

1.5 Tax

Current tax assets and liabilities

Current tax for current and prior periods is, to the extent unpaid, recognised as a liability. If the amount already paid in respect of current and prior periods exceeds the amount due for those periods, the excess is recognised as an asset.

Current tax liabilities (assets) for the current and prior periods are measured at the amount expected to be paid to (recovered from) the tax authorities, using the tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax assets and liabilities

A deferred tax liability is recognised for all taxable temporary differences, except to the extent that the deferred tax liability arises from the initial recognition of an asset or liability in a transaction which at the time of the transaction, affects neither accounting profit nor taxable profit (tax loss).

A deferred tax asset is recognised for all deductible temporary differences to the extent that it is probable that taxable profit will be available against which the deductible temporary difference can be utilised. A deferred tax asset is not recognised when it arises from the initial recognition of an asset or liability in a transaction at the time of the transaction, affects neither accounting profit nor taxable profit (tax loss).

A deferred tax asset is recognised for the carry forward of unused tax losses to the extent that it is probable that future taxable profit will be available against which the unused tax losses can be utilised.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

Sterling and Wilson Engineering Proprietary Limited

(Registration number 2013/189325/07)

Annual Financial Statements for the year ended 31 March 2022

Accounting Policies

1.5 Tax (continued)

Tax expenses

Current and deferred taxes are recognised as income or an expense and included in profit or loss for the period, except to the extent that the tax arises from:

- a transaction or event which is recognised, in the same or a different period, to other comprehensive income, or
- a business combination.

Current tax and deferred taxes are charged or credited to other comprehensive income if the tax relates to items that are credited or charged, in the same or a different period, to other comprehensive income.

Current tax and deferred taxes are charged or credited directly to equity if the tax relates to items that are credited or charged, in the same or a different period, directly in equity.

1.6 Inventories

Inventories are measured at the lower of cost and net realisable value.

Net realisable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale.

The cost of inventories comprises of all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition.

The cost of inventories of items that are not ordinarily interchangeable and goods or services produced and segregated for specific projects is assigned using specific identification of the individual costs.

When inventories are sold, the carrying amount of those inventories are recognised as an expense in the period in which the related revenue is recognised. The amount of any write-down of inventories to net realisable value and all losses of inventories are recognised as an expense in the period the write-down or loss occurs. The amount of any reversal of any write-down of inventories, arising from an increase in net realisable value, are recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

1.7 Leases

The company assesses whether a contract is, or contains a lease, at the inception of the contract.

A contract is, or contains a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

In order to assess whether a contract is, or contains a lease, management determine whether the asset under consideration is "identified", which means that the asset is either explicitly or implicitly specified in the contract and that the supplier does not have a substantial right of substitution throughout the period of use. Once management has concluded that the contract deals with an identified asset, the right to control the use thereof is considered. To this end, control over the use of an identified asset only exists when the company has the right to substantially all of the economic benefits from the use of the asset as well as the right to direct the use of the asset.

In circumstances where the determination of whether the contract is or contains a lease requires significant judgement, the relevant disclosures are provided in the significant judgments and sources of estimation uncertainty section of these accounting policies.

Sterling and Wilson Engineering Proprietary Limited

(Registration number 2013/189325/07)

Annual Financial Statements for the year ended 31 March 2022

Accounting Policies

1.7 Leases (continued)

Company as lessee

A lease liability and corresponding right-of-use asset are recognised at the lease commencement date, for all lease agreements for which the company is a lessee, except for short-term leases of 12 months or less, or leases of low value assets. For these leases, the company recognises the lease payments as an operating expense (note 16) on a straight-line basis over the term of the lease unless another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed.

The various lease and non-lease components of contracts containing leases are accounted for separately, with consideration being allocated to each lease component on the basis of the relative stand-alone prices of the lease components and the aggregate stand-alone price of the non-lease components (where non-lease components exist).

However as an exception to the preceding paragraph, the company has elected not to separate the non-lease components for leases of land and buildings.

Lease liability

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted by using the rate implicit in the lease. If this rate cannot be readily determined, the company uses its incremental borrowing rate.

Lease payments included in the measurement of the lease liability comprise the following:

- fixed lease payments, including in-substance fixed payments, less any lease incentives;
- lease payments in an optional renewal period if the company is reasonably certain to exercise an extension option;

The lease liability is presented as a separate line item on the Statement of Financial Position.

The lease liability is subsequently measured by increasing the carrying amount to reflect interest on the lease liability (using the effective interest method) and by reducing the carrying amount to reflect lease payments made. Interest charged on the lease liability is included in finance costs (note 18).

The company remeasures the lease liability (and makes a corresponding adjustment to the related right-of-use asset) when:

- there has been a change to the lease term, in which case the lease liability is remeasured by discounting the revised lease payments using a revised discount rate;
- there has been a change in the assessment of whether the company will exercise a purchase, termination or extension option, in which case the lease liability is remeasured by discounting the revised lease payments using a revised discount rate;
- there has been a change to the lease payments due to a change in an index or a rate, in which case the lease liability is remeasured by discounting the revised lease payments using the initial discount rate (unless the lease payments change is due to a change in a floating interest rate, in which case a revised discount rate is used);
- there has been a change in expected payment under a residual value guarantee, in which case the lease liability is remeasured by discounting the revised lease payments using the initial discount rate;
- a lease contract has been modified and the lease modification is not accounted for as a separate lease, in which case the lease liability is remeasured by discounting the revised payments using a revised discount rate.

When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or is recognised in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

Right-of-use assets

Right-of-use assets are presented as a separate line item on the Statement of Financial Position.

Lease payments included in the measurement of the lease liability comprise the following:

- the initial amount of the corresponding lease liability;
- any lease payments made at or before the commencement date;
- any initial direct costs incurred;
- any estimated costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, when the company incurs an obligation to do so, unless these costs are incurred to produce inventories; and

Sterling and Wilson Engineering Proprietary Limited

(Registration number 2013/189325/07)

Annual Financial Statements for the year ended 31 March 2022

Accounting Policies

1.7 Leases (continued)

- less any lease incentives received.

Right-of-use assets are subsequently measured at cost less accumulated depreciation and impairment losses.

Right-of-use assets are depreciated over the shorter period of lease term and useful life of the underlying asset. However, if a lease transfers ownership of the underlying asset or the cost of the right-of-use asset reflects that the company expects to exercise a purchase option, the related right-of-use asset is depreciated over the useful life of the underlying asset. Depreciation starts at the commencement date of a lease.

For right-of-use assets which are depreciated over their useful lives, the useful lives are determined consistently with items of the same class of property, plant and equipment. Refer to the accounting policy for property, plant and equipment for details of useful lives.

The residual value, useful life and depreciation method of each asset are reviewed at the end of each reporting year. If the expectations differ from previous estimates, the change is accounted for prospectively as a change in accounting estimate. Each part of a right-of-use asset with a cost that is significant in relation to the total cost of the asset is depreciated separately.

The depreciation charge for each year is recognised in profit or loss unless it is included in the carrying amount of another asset.

1.8 Impairment of assets

The company assesses at each end of the reporting period whether there is any indication that an asset may be impaired. If any such indication exists, the company estimates the recoverable amount of the asset.

If there is any indication that an asset may be impaired, the recoverable amount is estimated for the individual asset. If it is not possible to estimate the recoverable amount of the individual asset, the recoverable amount of the cash-generating unit to which the asset belongs is determined.

The recoverable amount of an asset or a cash-generating unit is the higher of its fair value less costs to sell and its value in use.

If the recoverable amount of an asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. That reduction is an impairment loss.

An impairment loss of assets carried at cost less any accumulated depreciation or amortisation is recognised immediately in profit or loss.

An entity assesses at each reporting date whether there is any indication that an impairment loss recognised in prior periods for assets other than goodwill may no longer exist or may have decreased. If any such indication exists, the recoverable amounts of those assets are estimated.

The increased carrying amount of an asset other than goodwill attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss of assets carried at cost less accumulated depreciation is recognised immediately in profit or loss.

1.9 Share capital and equity

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities.

If the company reacquires its own equity instruments, the consideration paid, including any directly attributable incremental costs (net of income taxes) on those instruments are deducted from until the shares are cancelled or reissued. No gain or loss is recognised in profit or loss on the purchase, sale, issue or cancellation of the company's own equity instruments. Consideration paid or received shall be recognised directly in .

(Registration number 2013/189325/07)

Annual Financial Statements for the year ended 31 March 2022

Accounting Policies

1.10 Employee benefits

Short-term employee benefits

The cost of short-term employee benefits, (those payable within 12 months after the service is rendered, such as paid vacation leave and sick leave, bonuses, and non-monetary benefits such as medical care), are recognised in the period in which the service is rendered and are not discounted.

The expected cost of compensated absences is recognised as an expense as the employees render services that increase their entitlement or, in the case of non-accumulating absences, when the absence occurs.

The expected cost of profit sharing and bonus payments is recognised as an expense when there is a legal or constructive obligation to make such payments as a result of past performance.

1.11 Provisions and contingencies

Provisions are recognised when:

- the company has a present obligation as a result of a past event;
- it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation; and
- a reliable estimate can be made of the obligation.

The amount of a provision is the present value of the expenditure expected to be required to settle the obligation.

Where some or all of the expenditure required to settle a provision is expected to be reimbursed by another party, the reimbursement shall be recognised when, and only when, it is virtually certain that reimbursement will be received if the entity settles the obligation. The reimbursement shall be treated as a separate asset. The amount recognised for the reimbursement shall not exceed the amount of the provision.

Contingent assets and contingent liabilities are not recognised.

1.12 Revenue from contracts with customers

The company recognises revenue from the following major sources:

- Provision of operations and maintenance contract services
- Sales of goods - Procuring and replacing spare parts
- Additional services rendered

Revenue is measured based on the consideration specified in a contract with a customer and excludes amounts collected on behalf of third parties. The company recognises revenue when it transfers control of a product or service to a customer.

Procuring and replacing spare parts

For sales of goods, revenue is recognised when control of the goods has transferred, being when the goods have been shipped to the customer's specific location. Following delivery, the customer has full discretion over the manner of distribution and price to sell the goods, has the primary responsibility when on selling the goods and bears the risks of obsolescence and loss in relation to the goods. A receivable is recognised by the company when the goods are delivered to the customer as this represents the point in time at which the right to consideration becomes unconditional, as only the passage of time is required before payment is due. No element of financing is deemed present as the sales are made with a credit term of 30 days, which is consistent with market practice.

Provision of operations and maintenance contract services

Included in the transaction price for the provision of operations and maintenance contract services. This service relates to maintenance work that may be required to be carried out on the equipment for a three year period after the initial sale. This period can then be extended if the customer requires additional years of maintenance services. The renewal of services after the three year period will be for the price at which these are sold by the entity to all of its customers as at the date of renewal regardless of the existence of a renewal option. Consequently, the option to extend the renewal period does not provide customers with any advantage when they enter into the initial contract and therefore no revenue has been deferred relating to this renewal option.

Sterling and Wilson Engineering Proprietary Limited

(Registration number 2013/189325/07)

Annual Financial Statements for the year ended 31 March 2022

Accounting Policies

1.12 Revenue from contracts with customers (continued)

Performance Incentives

Revenue relating to the services is recognised over time when the performance obligations are met.

Additional services rendered

The company provides additional support services. Revenue from providing services is recognised in the accounting period in which the services are rendered.

For fixed-price contracts, revenue is recognised based on the actual service provided to the end of the reporting period as a proportion of the total services to be provided. This is determined based on the actual labour hours spend relative to the total expected labour hours.

Interest is recognised, in profit or loss, using the effective interest method.

1.13 Turnover

Turnover comprises of sales to customers and service rendered to customers. Turnover is stated at the invoice amount and is exclusive of value added taxation.

1.14 Cost of sales

Contract costs comprise:

- costs that relate directly to the specific contract;
- costs that are attributable to contract activity in general and can be allocated to the contract; and
- such other costs as are specifically chargeable to the customer under the terms of the contract.

1.15 Borrowing costs

Finance costs comprise interest expense on borrowings and trade payables and are recognised as an expense in the period in which they are incurred.

1.16 Translation of foreign currencies

Foreign currency transactions

A foreign currency transaction is recorded, on initial recognition in Rands, by applying to the foreign currency amount the spot exchange rate between the functional currency and the foreign currency at the date of the transaction.

At the end of the reporting period:

- foreign currency monetary items are translated using the closing rate;
- non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rate at the date of the transaction; and
- non-monetary items that are measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined.

Exchange differences arising on the settlement of monetary items or on translating monetary items at rates different from those at which they were translated on initial recognition during the period or in previous annual financial statements are recognised in profit or loss in the period in which they arise.

When a gain or loss on a non-monetary item is recognised to other comprehensive income and accumulated in equity, any exchange component of that gain or loss is recognised to other comprehensive income and accumulated in equity. When a gain or loss on a non-monetary item is recognised in profit or loss, any exchange component of that gain or loss is recognised in profit or loss.

Cash flows arising from transactions in a foreign currency are recorded in Rands by applying to the foreign currency amount the exchange rate between the Rand and the foreign currency at the date of the cash flow.

Deferred tax in respect of prior periods	(333 681)	3 966 260
	8 621 569	7 334 842

Considering the future business plan and projected taxable profits from order in hand, deferred tax asset is recognised to the extent that it is probable that future taxable profit will be available against which they can be used.

Sterling and Wilson Engineering Proprietary Limited

(Registration number 2013/189325/07)

Annual Financial Statements for the year ended 31 March 2022

Notes to the Annual Financial Statements

Figures in Rand	2022	2021
6. Inventories		
Work in progress	-	25 000 000

Sterling and Wilson Engineering Proprietary Limited has set off an inventory amount of R25 million against income received in advance of R25 million from a customer. The contract was awarded a few years back and with the increase in the prices of modules it lead to the fact that the contract value as agreed upon on signing does not hold good today. The set-off was mutually agreed by both parties.

7. Trade and other receivables

Financial instruments:

Trade receivables	6 408 709	247 094 024
Loss allowance	-	(32 917 336)
Trade receivables at amortised cost	6 408 709	214 176 688
Deposits	1 390	54 690
Staff loans	-	19 000

Non-financial instruments:

Prepayments	323 562	345 596
Total trade and other receivables	6 733 661	214 595 974

Sterling and Wilson Engineering Proprietary Limited has set-off the amount of R94 million receivable from a customer against payable to a vendor based on the correspondences and discussions between the parties. In addition, the Company has also written off the trade receivable of R60 million as the same is not recoverable from the customer.

Exposure to credit risk

Trade receivables inherently expose the company to credit risk, being the risk that the company will incur financial loss if customers fail to make payments as they fall due.

The company's historical credit loss experience does not show significantly different loss patterns for different customer segments. The provision for credit losses is therefore based on past due status without disaggregating into further risk profiles. The loss allowance provision is determined as follows:

	2022	2022	2021	2021
Expected credit loss rate:	Estimated gross carrying amount at default	Loss allowance (Lifetime expected credit loss)	Estimated gross carrying amount at default	Loss allowance (Lifetime expected credit loss)
More than 120 days past due	6 408 709	-	247 094 024	32 917 336

Reconciliation of loss allowances

The following table shows the movement in the loss allowance (lifetime expected credit losses) for lease receivables:

Opening balance	(32 917 336)	(27 434 318)
Provision raised on new trade receivables	(3 511 838)	(5 483 018)
Provisions reversed on settled trade receivables	36 429 174	-
Closing balance	-	(32 917 336)

23. Financial instruments and risk management (continued)			
Capital risk management			
The company's objective when managing capital (which includes share capital, borrowings, working capital and cash and cash equivalents) is to maintain a flexible capital structure that reduces the cost of capital to an acceptable level of risk and to safeguard the company's ability to continue as a going concern while taking advantage of strategic opportunities in order to maximise stakeholder returns sustainably.			
The capital structure of the company consists of debt, which includes the borrowings (excluding derivative financial liabilities) disclosed in notes 11, cash and cash equivalents disclosed in note 8, and equity as disclosed in the statement of financial position.			
In order to maintain or adjust the capital structure, the company may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt.			
There have been no changes to what the entity manages as capital, the strategy for capital maintenance or externally imposed capital requirements from the previous year.			
Loans from group companies	11	86 980 006	95 800 747

Financial risk management

Credit risk

Credit risk is the risk of financial loss to the company if a customer or counterparty to a financial instrument fails to meet its contractual obligations.

Credit risk consists mainly of cash deposits, cash equivalents, derivative financial instruments and trade debtors. The company only deposits cash with major banks with high quality credit standing and limits exposure to any one counter-party.

Trade receivables comprise a small customer base. Management evaluated credit risk relating to customers on an ongoing basis. If customers are independently rated, these ratings are used. Otherwise, if there is no independent rating, risk control assesses the credit quality of the customer, taking into account its financial position, past experience and other factors. Individual risk limits are set based on internal or external ratings in accordance with limits set by the board. The utilisation of credit limits is regularly monitored.

The maximum exposure to credit risk is presented in the table below:

Sterling and Wilson Engineering Proprietary Limited

(Registration number 2013/189325/07)

Annual Financial Statements for the year ended 31 March 2022

Liquidity risk

Prudent liquidity risk management implies maintaining sufficient cash and marketable securities, the availability of funding through an adequate amount of committed credit facilities and the ability to close out market positions. Due to the dynamic nature of the underlying businesses, company treasury maintains flexibility in funding by maintaining availability under committed credit lines.

The company's risk to liquidity is a result of the funds available to cover future commitments. The company manages liquidity risk through an ongoing review of future commitments and credit facilities.

Cash flow forecasts are prepared and adequate utilised borrowing facilities are monitored.

The table below analyses the company's financial liabilities and net-settled derivative financial liabilities into relevant maturity groupings based on the remaining period at the statement of financial position to the contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows. Balances due within 12 months equal their carrying balances as the impact of discounting is not significant.

(Registration number 2013/189325/07)

Annual Financial Statements for the year ended 31 March 2022

Notes to the Annual Financial Statements

Figures in Rand	2022	2021
-----------------	------	------

23. Financial instruments and risk management (continued)

Foreign currency risk

The company operates internationally and is exposed to foreign exchange risk arising from various currency exposures, primarily with respect to the US dollar, Euro and the Indian Rupee. Foreign exchange risk arises from future commercial transactions, recognised assets and liabilities and net investments in foreign operations.

The company does not hedge foreign exchange fluctuations.

At 31 March 2022, if the currency had weakened/strengthened by 1% against the US dollar with all other variables held constant, post-tax profit for the year would have been R 434 013 (2021: R 958 007) higher/lower, mainly as a result of foreign exchange gains or losses on translation of foreign currencies denominated trade payables.

Exposure in foreign currency amounts

The net carrying amounts, in foreign currency of the above exposure was as follows:

US Dollar exposure:

Current liabilities:

Loans from group companies, USD 6 010 850 (2021: USD 6 456 925)	11	86 980 006	95 800 747
---	----	------------	------------

Exchange rates

Rand per unit of foreign currency:

US Dollar	14.471	14.837
-----------	--------	--------

Interest rate risk

The company's interest-bearing financial assets and liabilities expose it to risks associated with the effects of fluctuations in the prevailing levels of market interest rates. Variable interest rate assets and liabilities expose the company to cash flow interest rate risk, being the risk that cash flows earned or paid on such assets and liabilities will change due to movements in market rates.

At 31 March 2022, if interest rates on Rand-denominated borrowings had been 1% higher/lower with all other variables held constant, post-tax profit for the year would have been R 452 525 (2021: R 682 764) lower/higher, mainly as a result of higher/lower interest income on floating rate borrowings.

24. Going concern

We draw attention to the fact that at 31 March 2022, the company had accumulated losses of R (30 811 950) and that the company's total liabilities exceed its assets by R (30 811 830).

The annual financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business.

Management strongly believes that the company is a going concern as they are continuing with the 20 years operations and maintenance contract of which 6 years has been completed to date and this contract has a high gross margin. In addition to this, to support the continuance of the Company's operations, the shareholder has confirmed its willingness to continue the operations of the Company and to provide sufficient funds as may be necessary to meet liabilities that cannot be met out of the Company's available resources.

Sterling and Wilson Engineering Proprietary Limited

Annual Financial Statements for the year ended 31 March 2022

Notes to the Annual Financial Statements

Figures in Rand	2022	2021
-----------------	------	------

25. Events after the reporting period

The COVID-19 pandemic continued into the 2021 with vaccination programs globally underway and a cautiously positive outlook for 2022. The company has not been significantly impacted to date.

The directors are not aware of any other material event which occurred after the reporting date and up to the date of this report.

26. Contingent liabilities

Income tax:

The company was subject to an audit by SARS in respect to the 2016 year of assessment. As a result SARS raised an additional assessment amounting to R80 609 557 on 19 April 2021.

The additional assessment relates to dis-allowance of certain deductions claimed under section 24C as well as expenditure deemed capital and or excessive by SARS . The company is appealing the assessment and management expects the dispute to be resolved in the next 12 months. Management is unable to determine the final liability as this is currently in dispute.

During the current year, there was progress on the discussion with SARS at various levels but dispute is still ongoing.
