(b) Measurement of fair values

Valuation techniques and significant unobservable inputs

The following table shows the valuation techniques used in measuring Level 2 and Level 3 fair values for financial instruments measured at fair value in the statement of financial position as well as the significant unobservable inputs used.

Financial instruments measured at fair value

Type	Valuation technique	Significant unobservable inputs	Inter-relationship between significant unobservable inputs and fair value measurement
Amortised cost: 1. Security deposits (Asset) 2. Borrowings	Discounted cash flow approach: The valuation model considers the present value of expected payments, discounted using a risk adjusted discount rate.	Not applicable	Not applicable
Forward contracts for foreign exchange contracts	Forward pricing: The fair value is determined using quoted forward exchange rates at the reporting date and present value calculations based on high credit quality yield curves in the respective currency.	Not applicable	Not applicable

Transfers between Levels 1 and 2

There have been no transfers between Level 1 and Level 2 during the reporting year/periods.

Level 3 fair values

There are no items in Level 3 fair values.

10 Financial instruments – Fair values and risk management (Continued)

(c) Financial risk management

The Company has exposure to the following risks arising from financial instruments:

- i) Credit risk ;
- ii) Liquidity risk ; and
- iii) Market risk

Risk management framework

The management has overall responsibility for the establishment and oversight of the Company's risk management framework. The Board of directors is responsible for developing and monitoring the Company's risk management policies.

The Company's risk management policies are established to identify and analyse the risks faced by the Company, to set appropriate risk limits and controls and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Company's activities. The Company, through its training and management standards and procedures, aims to maintain a disciplined and constructive control environment in which all employees understand their roles and obligations.

The Audit Committee oversees how management monitors compliance with the Company's risk management policies and procedures, and reviews the adequacy of the risk management framework in relation to the risks faced by the Company. The Audit Committee is assisted in its oversight role by internal audit. Internal audit undertakes both regular and ad hoc reviews of risk management controls and procedures, the results of which are reported to the Board of directors.

10 Financial instruments – Fair values and risk management (*Continued*)

(c) Financial risk management (*Continued*)

i. Credit risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Company's receivables from customers and investment in debt securities. The carrying amounts of financial assets represent the maximum credit exposure.

Trade and other receivables

The Company's exposure to credit risk is influenced mainly by the individual characteristics of each customer. The demographics of the customer, including the default risk of the industry and country in which the customer operates, also has an influence on credit risk assessment. Credit risk is managed through credit approvals, establishing credit limits and continuously monitoring the creditworthiness of customers to which the Company grants credit terms in the normal course of business. The Company establishes an allowances for doubtful debts and impairments that represents its estimates of incurred losses in respect of trade and other receivable and investment.

Total trade receivable as on 31 March 2022 is THB Nil (31 March 2021: THB Nil)

As per simplified approach, the Company makes provision of expected credit losses on trade receivables to mitigate the risk of default payments and makes appropriate provision at each reporting date wherever outstanding is for longer period and involves higher risk.

Cash and bank balances

The Company held cash and cash equivalents and other bank balances with credit worthy banks and financial institutions of THB 69,526 as at 31 March 2022 (31 March 2021: THB 69,526). The credit worthiness of the such bank and financial institutions is evaluated by management on an ongoing basis and is considered to be good.

Security deposits given to lessors

The Company has not given security deposit as at 31 March 2022 and 31 March 2021.

Sterling and Wilson (Thailand) Co., Limited

for the year ended 31 March 2022

(Currency : Thai Baht)

10 Financial instruments – Fair values and risk management (*Continued*)

(c) Financial risk management (*Continued*)

ii Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they become due. The Company manages its liquidity risk by ensuring, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risk to the Company's reputation.

As at 31 March 2022, the Company had cash and cash equivalents of PHP Nil (31 March 2021: PHP Nil).

Notes to the standalone financial statements (Continued)

for the year ended 31 March 2022

(Currency : Thai Baht)

10 Financial instruments – Fair values and risk management (Continued)

(c) Financial risk management (Continued)

iii Market risk

Market risk is the risk of loss of future earnings, fair values or future cash flows that may result from adverse changes in market rates and prices (such as interest rates, foreign currency exchange rates) or in the price of market risk-sensitive instruments as a result of such adverse changes in market rates and prices. Market risk is attributable to all market risk-sensitive financial instruments, all foreign currency receivables and payables and all short term and long-term debt. The Company is exposed to market risk primarily related to foreign exchange rate risk, interest rate risk and the market value of its investments. Thus, the Company's exposure to market risk is a function of investing and borrowing activities and revenue generating and operating activities in foreign currencies.

(a) Currency Risk

The Company is exposed to currency risk on account of its operating and financing activities. The functional currency of the Company is Indian Rupee.

Exposure to currency risk

The currency profile of financial assets and financial liabilities as at 31 March 2021 and 31 March 2020 are as below:

Amounts in INR	31 March 2022	31 March 2021
	USD	USD
Financial assets		
Trade receivables	-	-
Cash and Cash Equivalents	-	-
Exposure to foreign currency assets	-	-
Forward exchange contract		
Net exposure to foreign currency assets	-	-
Financial liabilities		
Trade payables and other payable	-	-
Exposure to foreign currency liabilities	-	-
Forward exchange contract	-	-
Net exposure to foreign currency liabilities	-	-
Net Exposure	-	-

Sensitivity analysis

A 5% strengthening / weakening of the respective foreign currencies with respect to functional currency of Company would result in increase or decrease in profit or loss and equity as shown in table below. This analysis assumes that all other variables, in particular interest rates, remain constant and ignores any impact of forecast sales and purchases. The following analysis has been worked out based on the exposures as of the date of statements of financial position.

Effect in INR million	31 March 2022		31 March 2021	
	Profit or loss		Profit or loss	
	Strengthening	Weakening	Strengthening	Weakening
USD	-	-	-	-
